Career Objective

- **Github** : github.com/Yogananda4617

     I'm a young and motivated individual who is reliable and confident with proven skills. I enjoy problem-solving and am quick to learn, have good communication skills as well as the ability to work efficiently both individually and as part of a team in a professional environment. I'm committed to working in the IT industry, skill and subject I am deeply passionate about.

Experience

- **Infosys Limited | Apple Vendor**
  08/2022 - Present
  React Frontend Developer
  Working with Apple in implementing user friendly Developer Experience Portal.
  - Developed frontend components and modules, including multipipeline visualization, project setup, and project preview using React, Typescript, Zustand, and AntDesign.
  - Using React flows concept for multipipeline visualization to present data in form of tree structures.
  - Created Server-Sent Events module for real-time logs for all pipeline executions and deployment processes.
  - Added a central error handling and notification layer in all UI modules to provide a uniform UX.
  - Drove the generalization and abstraction in the codebase to achieve reusability and readability for new developers.
  - Integrated UI analytics for the web application to analyse the usage of features thereby helping make decisions on enhancement and bug prioritisation.
  - Designed, wireframed and built frontend components for a Developer Experience Portal, in collaboration with multiple customer teams and stakeholders.
  - Contributed and assisted in the frontend architecture design of the Developer Experience Portal by implementing Micro Frontend Architecture which reduces maintenance demands, results in faster and more efficient development cycles and reduces complexity when implementing changes.

- **HCL Technologies**
  10/2020 - 03/2022
  React Frontend Developer
  Worked on two projects, implementation of customer service portal and design and development of company website.
  - Working on the technical implementation of support portal and company website.
  - Translate designes and wireframes into a highly responsive user interface and reusable components using React Js.
  - Used Backend API's to display data using custom components, library components.
  - Supporting and creation of standardized documentation and code review.
  - Worked on tracking and maintaining the latest Kb's and related customer guides on a everyday basis.
